

BTI Study CLUB

EXTRACT, PRESERVE, REGENERATE: A Hands-On Guide to atraumatic extractions, PRGF-ENDORET® and Socket Management

Exclusive, highly practical study club dedicated to *the biology of socket healing, the art of the atraumatic extraction, and the clinical application of BTI PRGF-ENDORET®*

Basingstoke

DATE:
THURSDAY
9TH JULY
2026

VENUE:
THE RED LION
Basingstoke, RG21 7LX

TIME:
6:30-8:30 pm

SPEAKER

Dr. James Kleiber
(BDS, MFDS, RCS Eng) Pg dip
(Dental Law and Ethics)

- *Postgraduate: MFDS Royal College of Surgeons of England May 2004*
- *Dental Law and Ethics (PGcert) July 2019*
- *University: United Medical and Dental Schools of Guy's 1997-2002 and St Thomas' London*
- *BDS (Lond.) 2002*

Programme 2 hours verifiable CPD

THE BIOLOGY OF HEALING:

Understanding the rationale behind socket preservation and the role of autologous blood concentrates.

ATRAUMATIC EXTRACTION MASTERY:

Key principles, tips, and tricks for preserving the hard and soft tissues during routine and complex extractions.

THE BTI PRGF-ENDORET[®] WORKFLOW:

Step-by-step guidance on phlebotomy, centrifugation, fractionation, and the application of PRGF in the extraction site.

CLINICAL CASE REVIEWS:

Real-world examples demonstrating the difference PRGF makes in post-operative healing and tissue volume.

HANDS-ON PRACTICAL SESSION:

This study club features a strong practical component to ensure you leave with skills you can immediately implement in practice.

PRGF PREPARATION:

A live, step-by-step practical demonstration of the BTI PRGF-ENDORET[®] system, showing exactly how to process and handle the PRGF matrix.

EXTRACTION TECHNIQUES:

Hands-on practice focusing on atraumatic extraction techniques, utilizing advanced surgical instrumentation and minimally invasive approaches to protect the socket architecture.

(Note: Attendees will have the opportunity to get hands-on with advanced surgical tools designed for optimal bone preservation).

Registration:
