

# INTERNATIONAL COURSE 2024

Eduardo Anitua Institute (Spain)

Dr. Eduardo Anitua MD, DDS, PHD

## A biological approach to Implantology

**Dates**

June 3<sup>rd</sup>-7<sup>th</sup>

**MORE INFORMATION**

# Program

- BTI Biotechnology:
  - The approach to implantology according to the knowledge and techniques of the Biotechnology Institute.
- Live Surgeries of Complex Rehabilitations with Dr. E. Anitua.
- Diagnosis and Digital Treatment Planning.
- A Biological Approach to Implant Osteotomy Drilling technique without irrigation and implants insertion protocols.
- PRGF-ENDORET® Technology:
  - Growth factors, scientific bases and clinical works.
- Advanced Surgical Techniques:
  - Treatment of atrophic jaws (expansion and split techniques, sinus lift, vertical growth,...).
- Innovative concepts in biomechanics (short implants, immediate loading,...).
- Surgical Technique for Sinus Lift:
  - Indications and protocol for sinus lift
  - Complications and complications management in sinus lift.
  - Alternative approach to sinus lift (short implants and crestal approach).
- Immediate Loading and Complex Rehabilitation using the BTI Technique:
- Indications and protocols for immediate loading.
- Planning single tooth, partial and full edentulism rehabilitation.

# Hands On

- PRGF-ENDORET® technology: obtaining protocol.
- PRGF-ENDORET® manipulation: obtaining grafts and fibrin membranes.
- Drilling protocol and implant placement and extraction on models.
- Treatment planning using BTI Scan® 4 software.
- Block Grafts.

# Objective

The BTI seminar includes a 5 day intensive course presenting a new Biological Approach to Implantology based on the most recent data and techniques developed by the Biotechnology Institute.

The educational objective of the course is to offer the attendees an innovative working method and predictable protocols which are the result of advanced scientific research and extensive clinical experience. The seminars are based on a complete and multidisciplinary approach starting from the treatment planning phase to bone rege-

neration techniques. They also focus on necessary protocols for the treatment of complex rehabilitations through live surgeries in closed circuit, practical workshops and specialized conferences coordinated by Dr. E. Anitua and his team of experts.

Doctors attending the seminars will obtain customized training and will be exposed to the modern facilities offered by the prestigious BTI Training Center "Instituto Eduardo Anitua" in Vitoria-Gasteiz (SPAIN)."

# Certification

Participants will receive a Certificate of Attendance (40 CEU credits).

Sponsored by:

**BTI of North America**

Approved PACE Program Provider FAGD/MAGD Credit Approval does not imply acceptance by a state or provincial board of dentistry or AGD endorsement (4/1/2019 to 3/31/2022).

*\* Given the limited number of seats enrollment is compulsory*

*\*\* The information and data included in this program is updated at the time of printing and may vary.*

**PACE**  
ACADEMY of  
GENERAL DENTISTRY  
PROGRAM APPROVAL  
FOR CONTINUING  
EDUCATION

# Scientific director

**Dr. Eduardo Anitua**

MD · DDS · PHD

Scientific director of BTI Biotechnology Institute.

## Registration

**\$ 4900 / attendant**

Includes:

- Professional information packets
- Research articles
- Transfer from and to the international airport of Bilbao (Spain).
- 1 day tour in La Rioja
- 7 nights accommodation (breakfast included)
- Coffee breaks, lunches, welcome and farewell events.

**Eduardo Anitua Institute  
BTI Training Centre**

Vitoria-Gasteiz (Álava) Spain

*BTI BIOTECHNOLOGY will notify one month in advance if the course has not reached the minimum number attendance to be held.*
